TEST PLAN DOCUMENT

WORKTRACKER-Manual Testing Project

1. Document Control

Item	Details
Document Name	WorkTracker – Manual Testing Test Plan
Project Name	WorkTracker
Testing Type	Manual Testing
Prepared By	QA Tester
Date	27/09/2026
Document Version	1.0

2. Introduction

2.1 Purpose

The purpose of this test plan is to define the testing approach for the **WorkTracker application** and verify that its features work as expected. It focuses on validating the functional requirements, identifying defects, and ensuring that the application meets the expected user requirements.

2.2 Scope

This Test Plan covers manual testing of:

- Frontend (Employee/Admim Side)
- Functional requirements

3. Test Strategy

3.1 Types of Testing

Testing Type	Description
Functional Testing	Verifies that each feature performs its intended function.
Integration Testing	Verifies the interaction between different modules.
System Testing	Verifies the complete application as a single system.
UI Testing	Verifies the interface elements and their presentation.
Smoke Testing	Verifies the basic functions of the application.
Regression Testing	Verifies that existing features are not affected by changes.
Retesting	Verifies that corrected defects are fixed successfully.

3.2 Test Levels

Test Level	Description
Integration Testing	Verifies the interaction between different modules.
System Testing	Verifies the complete WorkTracker application as a whole.
User Acceptance Testing (UAT)	Verifies whether the application meets user requirements.

4. Test Environment

Environment Item	Details

Application	WorkTracker Web Application
Application Type	Web Application
Operating System	Windows 11
Browser	Google Chrome
Testing Type	Manual Testing
Test Data	Valid and invalid test data
User Accounts	Multiple test accounts
Network	Wi-Fi Connection

5. Test Scope

5.1 In-Scope

Frontend Modules:

- Registration
- Login
- Overview
- Employees
- Attendance
- Leaves
- Salary
- Tasks
- Feedback
- Profile
- Logout

5.2 Out-of-Scope

- Backend testing
- Database testing
- API testing
- Performance testing
- Security testing
- Source code testing
- Server-side testing

6. Entry & Exit Criteria

6.1 Entry Criteria

Testing can be started when:

- Application is available and accessible.
- Test environment is ready.
- Required test data is available.
- Test scenarios and test cases are prepared.
- Required user accounts are available.
- Application requirements are available for reference.

6.2 Exit Criteria

Testing can be completed when:

- All planned test cases are executed.
- Test results are documented.
- Identified defects are reported.
- Retesting is completed for fixed defects.
- Regression testing is completed.
- Test summary is prepared.
- All major functionalities are verified.

7. Suspension & Resumption Criteria

7.1 Suspension Criteria

Testing will be suspended when:

- Application is unavailable.
- A critical defect blocks testing.
- Test environment is unavailable.

7.2 Resumption Criteria

Testing will be resumed when:

- Application becomes available.
- Critical defect is fixed.
- Test environment is restored.

8. Test Deliverables

The following documents will be prepared during the testing process:

- Test Plan
- Test Scenarios

- Test Cases
- Requirement Traceability Matrix (RTM)
- Test Execution Report
- Defect Report
- Defect Screenshot
- Defect Summary
- Test Summary Report
- Test Closure Report

9. Defect Management

- Defects logged in Excel.
- Severity and priority assigned.
- Steps to reproduce and expected/actual results documented.
- Screenshot attached as evidence.
- Defects retested after fixing.

10. Roles & Responsibilities

Role	Responsibilities
QA Tester	Prepare test cases, execute tests, log defects, and perform retesting.
Developer	Analyze and fix reported defects.
Test Lead	Review test documents and monitor testing activities.
Project Manager	Monitor the overall project and approve deliverables.

11. Test Schedule

Phase	Duration
Test Planning	2 Days
Test Case Design	2 Days
Test Execution	3 Days
Defect Reporting & Retesting	1 Day
Test Closure	1 Day

12. Risks & Mitigation

Risk	Mitigation
Requirements Changes	Review and update test cases based on the changed requirements.
Environment Issues	Check and maintain the test environment before testing.
Time Constraints	Prioritize critical functionalities and complete testing within the planned schedule.

13. Test Metrics

- Test Case Execution Percentage

- Pass/Fail Ration
- Severity-wise Defect Distribution

14. Tools

- **Test Case Management:** Microsoft Excel
- **Defect Tracking:** Microsoft Excel
- **Browser:** Google Chrome
- **Documentation:** Microsoft Word
- **Screenshots:** Snipping Tool

15. Assumptions

- Stable test environment is available.
- Defects are fixed by the development team on time.

16. Test Closure

- All planned test cases are executed.
- Test results are documented.
- Defects are reported and retested.
- Test summary report is prepared.
- Testing activities are completed.
